CEMENTITIOUS MATERIALS REGISTRATION SCHEME (CMRS) - REGISTERED PRODUCTS LIST.

APPENDIX:

1) De-registration may occur for any number of reasons including the product, manufacturer or intermediary ceased to be available.

2) The following material designations may appear in the Registered Products List:

- AS 3972 Types: GP, SL, LH, HE

- AS 3582 Series Types: Fly Ash (FA) Fine and/or Special Grade, Slag (GGBFS), Amorphous Silica (Silica Fume)

- SP43 Designations: SRC (sulphate resisting cement), High Slag (>55%), High FA (>30%), Off-white, GB2 (binary general blend), and GB3 (ternary general blend)

3) Inactive products are ATIC registered products reporting “no production” for more than 12 consecutive months or where a supplier has informed the CMRS administrator that the product is no longer being produced.

4) Products defined as "Unproven Source (Missing results)" are products that have been assessed according to the following criteria.

- 28-compressive strength, 28-day shrinkage and available alkali tests shall have results from the calendar month prior to the issue date*.

- All other testing shall comply with the minimum freqency requirements and be reported monthly*.

Products that do not meet these requirements have been reclassified, however testing frequency remains as per a proven source.

***Unless otherwise communicated by suppliers.**
